

Are you an autistic person between the ages of 16-40?

Interested in participating in research to help us learn more about how autistic people time their movements?

What's involved?

- Come to the Music and Health Science Research Collaboratory (3rd floor @ 90 Wellesley St. West)
- Spend approximately one-hour tracing circles on a touch-screen device with sound.
- Fill out a short exit survey about your experience.

You can participate if you are:

- A person with autism or Aspergers, between ages 16-40.
- Not a professional musician or athlete.
- Fully vaccinated against COVID-19
- Have normal (or corrected to normal) vision and good hearing.
- Generally able to carry out tasks such as writing and typing.

Individuals who participate in the study will receive a \$15 gift card.

Interested? Email Nicole Richard: Nicolem.richard@mail.utoronto.ca or scan the QR code to send an email expressing interest.
