

Transition to College/University

Skills for Postsecondary Pathways

Student Edition

Introduction

Do you remember how you felt when you started your first year of high school? There is a good chance that starting college/university (C/U) will feel similar. Starting C/U is a time to show your skills and independence. You will be treated like an adult and will be required to meet certain expectations.

Colleges and universities follow the Human Rights Code rather than the Education Act. This means that you will no longer have an IEP, access to specialized services such as the Autism team, or a resource monitoring teacher. You will need to discuss your diagnosis independently with the Accessibility Services Office and with each professor in order to receive accommodations. Accommodations in C/U will likely be different from those received in high school.

About This Document

There are certain skills that will help you succeed in C/U. Once you fill out this checklist, you will gain a better understanding of the skills that you already have and the ones that require practice throughout the year. Discuss these items with your family and/or teachers. This document has been broken down into the following categories and subcategories;

Executive Functioning	Independent Living Skills	Social Interactions
Organization Skills Time Management Skills Note Taking Skills Study Skills Test Taking Skills Self-Management Skills	Navigating a New Environment Life Skills Library Skills	Interacting within a Group Assignment Interacting with Teachers

Using the Checklists

This document focuses on transition goals to set in high school so that skills are practiced and developed by C/U. Each checklist starts with a **Transition goal** to work on while in high school (**HS**), followed by a list of steps to help achieve it. It ends with **C/U** which is when you can apply all the things you've practiced. There may be many skills that you need to continue working on and that's okay, they will develop over time. The box labeled **Next Step** is what you need to work on next. This document would be a good tool to use regularly and to determine progress towards your goals.

Follow this legend as you complete each checklist.

Y- Yes I do this

N- No, I need to do this

S- Someone does this for me

N/A- Not applicable to me

These are suggested minimum skills required for success in college/university

- Sustained attention during class
- Maintain satisfactory notes
- Develop organizational skills
- Understand and complete assignments
- Successfully complete tests and exams
- Gain information from written material
- Produce quality written work

Executive Functioning Checklists

Our brains control our executive functioning. Executive functions include skills such as “maintaining attention, controlling impulses, keeping free of distractions, engaging in mental planning, problem solving, maintaining flexibility, time management, setting priorities, organizing, and executing a task” (Geffner, 2007). Difficulty with any of these abilities can cause challenges with academics and everyday life tasks.

When managing your time, think about this:

In C/U, for every 1 hour of lecture, there is 2-3 hours of independent work outside of the class.

This can include, studying, making notes, reading etc.
